

## Introduction:

Tourism.com is a tourist website where you can select different tour packages.

This website is made as a college laboratory project. On this website, you will have a Sign-in page and the sign-up page, where you can either register or log in to use the services. Here we used **Languages:**

- ❖ HTML
- ❖ CSS
- ❖ JavaScript
- ❖ XML
- ❖ JSP
- ❖ servlets e.t.c

## Software:

- ❖ Tomcat (version 9)
- ❖ XAMPP (Server)
- ❖ Browser
- ❖ Atom (Text Editor)

## File links:

Link to download project file.

[RAR File](#)

## How to Install and Run:

## Step:1

- ❖ Download and install the Tomcat version
  - [Download link](#)
- ❖ Download and install xampp
  - [Download link](#)
- ❖ Download and extract RAR file into a web-apps folder in tomcat
  - [Download link](#)

## Step:2

- ❖ **Start Tomcat**
  - Click on: Start → Monitor tomcat → Start
- ❖ **Start XAMPP**
  - Click on: Start → Xampp
    - Start SQL And Apache
- ❖ Click on my Admin in SQL and run the commands from the below files
  - [Download link](#)

## How It Works:

When you open our project folder in tomcat, the first page you see is the sign-in page.

You can access the sig-in page code here [index.html](#)

You can access the sig-in page code here [register.html](#)

About Dealers

If your credentials are not correct, you will come up with a page Shown below:

You can access the error page code here: [error.html](#)

**Not a user**

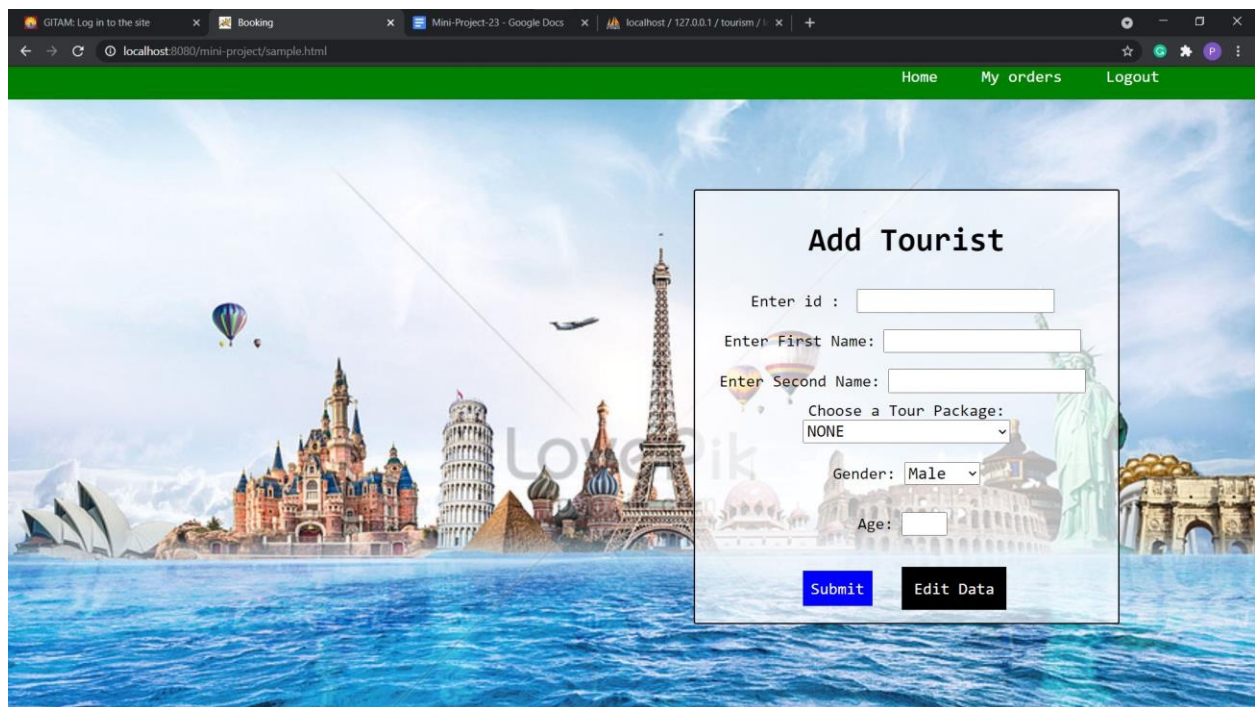

**Please register to continue services**

[Go back to home page](#)

You can click on **Go back to home page** and will be again redirected to the login page where you can either log in or register yourself.

If the credentials are correct, you will be redirected to the bookings page, where you can add tourists and select packages.

You can access the code from here: [sample.html](#)

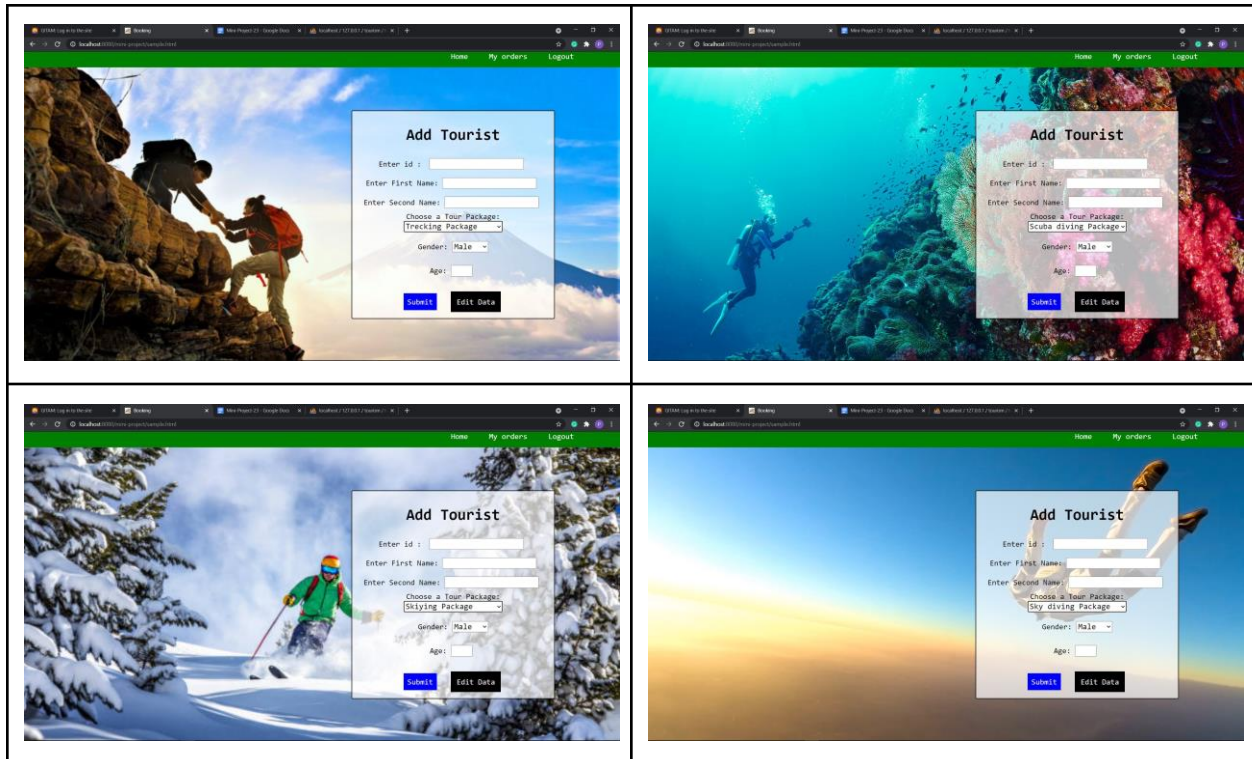

Based on your package, the background will change accordingly. You can navigate to **My orders** and **Logout** from the Navbar.

The animation will be like this:

Even the text boxes are animated and respond accordingly. You can edit data from Option **Edit data**.

You can access the code from here for the [booking page](#).

## Interface:

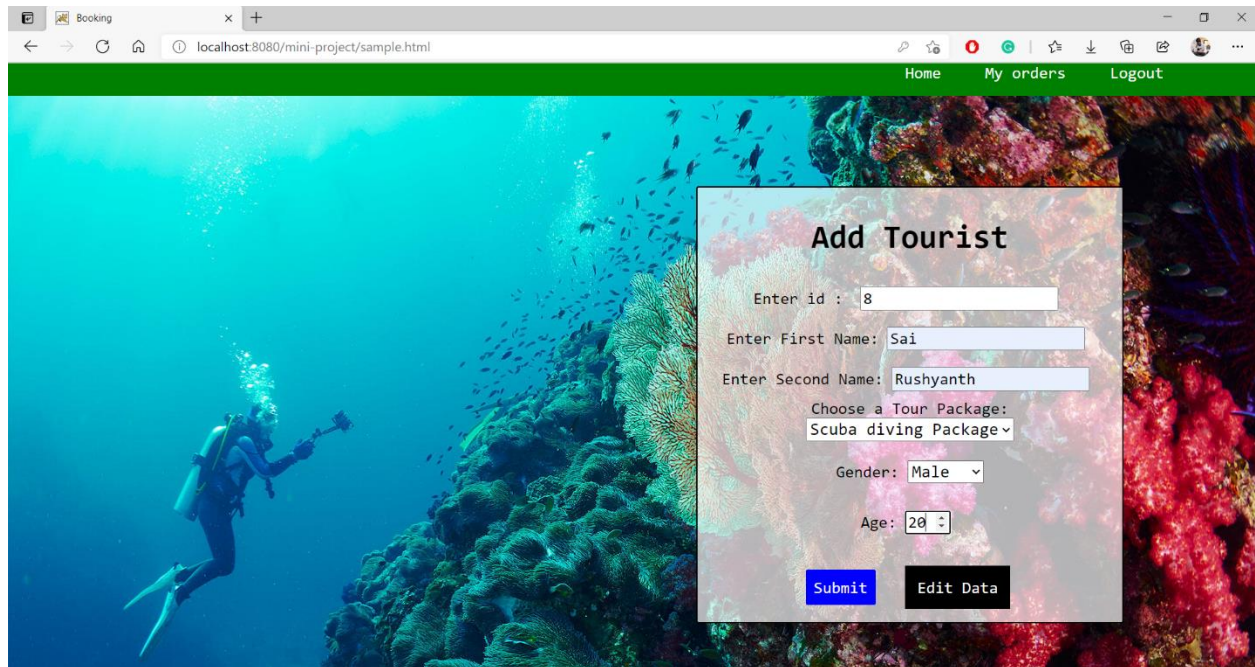

Adding data:

You give the data and click submit.

**Note:** The data with the same id cannot be modified or deleted  
Independently.

After you add the data, a page pop out like this.

This means the data is inserted into properly into the server.

You can access the code of the file here:

From here you can **ADD Data** or **Delete Data** By clicking on them.

**inserted**

[Add Data](#)   [Edit Data](#)

By clicking on the edit button, you will be redirected to editing.JSP

You can access the code here: [editing.JSP](#)

[Go back to My orders](#)   [Adding data](#)   [Logout](#)

### My orders

id	first name	last name	Tour package	Gender	Age	Update	Delete
Rus	Sai	Rushyanth	trecking	male	20	<a href="#">update</a>	<a href="#">Deldata</a>
63	Sai	Rushyanth	scuba diving	male	20	<a href="#">update</a>	<a href="#">Deldata</a>
8	Sai	Rushyanth	scuba diving	male	20	<a href="#">update</a>	<a href="#">Deldata</a>

You can update or delete data from here.

Update page

Click update or go back to the editing page.

You can access the code here: [update](#).

### Update data from database in jsp

8
First name:
Sai
Last_name:
Rushyanth
Tour Details:
scuba diving
Gender:
male
Age:
20
submit

**Note: the above database is going to update**
